

The Doctor is In: Thoughts from Dr. Studwell

As I sit back and reflect, it is hard to believe that we reached two years as a company. Since then, a lot has happened and changed in our lives & in the world in such a short time. When I first pondered starting my own company, I never could have envisioned what it has become. We are no longer just ExoConsulting, but we are now the parent company to EC Sports Management and Chesapeake Analytics, along with Race Weather, which is where it all began. Along this journey, I never would have imagined these global connections I have made. My coworkers, customers, and clients are now lifelong friends. I have not only seen my team grow in numbers, but also fostering their personal growth has been rewarding. One of the many lessons learned is to always have an open mind and be adaptable. We wouldn't be here without understanding the path is not singular, but rather a series of choices. We look forward to where the path will take us as a company, thank you to all who have joined us, and for your continuing support.

Semper incendendo.

It's Only Been Two Years, but...

You wouldn't think the world could change so much in the last two years, but 2020 was no ordinary year! ExoConsulting was founded in the middle of the pandemic when jobs were scarce, and the possibility of a Covid-19 vaccine was still months away. While movie theaters were closing, we started EC in order to help bring people together. From my couch in Oklahoma to the same couch now in Maryland, the company has grown exponentially to seven employees.

Here's a look at some other changes (by the numbers) since the year 2020:

	Then (2020)	Now (2022 to date)
Price of a gallon of gas	\$2.17	\$4.96
Number of movie theaters	5,798	2,525
Annual movie ticket sales	222 million	761 million
Average new car price	\$40,107	\$47,000
US Population	329.5 million	332.4 million
